

Typical Properties

Appearance	White to pale yellow liquid
S.G. @ 25°C	0.750 - 0.850
Vis@40°C, cSt	10 - 20
Flash Point C.O.C., °C	> 80
Std Packaging (NW / GW, Kg)	175.0 / 165.0

Product Description

FOAMQUER 9371 is a kind of antifoam/defoaming additive based on the chemistry of mixture of silicon and polyacrylate copolymer. The mixture in the fluid can decrease the air solubility that will inhibit foam formation. Also, it exhibits defoaming capability, which is suitable for use in the formulations of gear, hydraulic, turbine and other industrial oils.

FOAMQUER 9371 has good dispersibility in mineral oils, synthetic oils, and synthetic esters, so is suitable for use in the formulations of gear, hydraulic, turbine and other industrial oils.

FOAMQUER 9371 is blended with specially selected solvents that will not get the lubricants hazy or decrease product lubricity.

Recommended dosage is 50-1000 ppm.

Print date: 04-02-25
